Patient Information Handout

Nuclear Medicine Thyroid Scan

A Nuclear Medicine Thyroid Scan is performed to assess the functioning of your thyroid gland. It involves a small injection of a radioactive tracer into a vein in your arm. There are no side effects from the injection. After this injection there will be a 20 minute wait before imaging commences. After the 20 minute wait you will be positioned underneath the scanner, which will be positioned very close over your face and neck. A series of images will be taken for about 20 minutes.

This study is unsuitable for pregnant women. Breast-feeding mothers can have a Nuclear Medicine Thyroid Scan but will be required to express and discard their breast milk for a period of time after the injection.

BOOKING YOUR APPOINTMENT

Please call our friendly staff on 8402 0200. You may request a site convenient to you; otherwise the booking staff can suggest your nearest location.

WHAT TO BRING

Radiology referral
Medicare card
Healthcare / Concession card (if applicable)
Previous relevant imaging
If you have had a recent blood test with your doctor for your thyroid levels please bring a copy of the blood test result with you.

PREPARATION FOR YOUR STUDY

Some medications can interfere with this scan. They may need to be ceased for a period of time prior to your scan (refer to **table** below as a guideline). This will need to be discussed with you and your doctor at the time of your booking. You also need to wait 4 weeks after injection of CT contrast dye before having a thyroid scan.

You may resume all medications after the scan.

Type of medication	Withdrawal period
Intravenous contrast/dye (often	Wait minimum 4 weeks before
used for CT scans and some x-ray	having Nuclear Medicine Thyroid
procedures)	Scan
lodine (e.g. kelp, some	4 weeks
multivitamin preparations)	
Anti-thyroid drugs:	Do not withdraw but please
Propylthiouracil (PTU)	inform us if you are on any of
Neomercazole	these medications
Carbimazole	
Cardiac medication:	Do not withdraw but please
Amiodarone (cordarone X, aratac)	inform us if you are on this
	medication
Thyroxine/oroxine (T4)	4 weeks
Thyroid extract	
Eutroxsig	
Tertroxine (T3)	1 week

TIME REQUIRED

This test takes up to 1 hour to complete.
