PET MEDICARE REBATES ARE AVAILABLE FOR:

- PET FDG scans for Initial Staging and Restaging of Cancer
- PSMA PET scans for Prostate specific scanning, including initial staging and early detection of recurrence
- PET Brain scans for Alzheimer's Disease
- Scanning for Inflammation, Infection & Malignancy

***For a full list of indications, turn over.*

BENEFITS OF A PET SCAN

- No contrast reactions from PET tracers
- Safe for patients with renal impairment
- Improved sensitivity compared with CT: can detect disease earlier
- Improved diagnosis: can characterise lesions as benign or malignant

PET REBATABLE MBS CODES

AUGUST 2025

BRAIN

- 61560 Alzheimer's Disease
- 61538 Brain Tumour
- 61559 Epilepsy

BREAST CANCER

- 61524 Staging
- 61525 Suspected metastatic or recurrent

CANCER

- 61612 (Initial staging of Cancer) *
- 61614 (Restaging of Cancer) *

CERVIX CANCER

- 61571 Initial staging
- 61575 Further staging

COLORECTAL CANCER

- 61541 Suspected residual, metastatic or recurrent

HEAD & NECK CANCER

- 61598 Staging new or recurrent
- 61604 Suspected residual

INFECTION & INFLAMMATION

- 61527 Gallium Supply Disruption

LYMPHOMA

- 61620 Staging new or untreated
- 61622 Residual
- 61628 Restaging
- 61632 Pre Stem Cell Transplant

LUNG

- 61523 Solitary nodule
- 61529 Staging

MELANOMA

- 61553 Suspected metastatic or recurrent

OESOPHAGEAL OR GEJ CANCER

- 61577 Staging

OVARIAN CANCER

- 61565 Suspected residual, metastatic or recurrent

PROSTATE PSMA

- 61563 Initial staging
- 61564 Restaging
- 61528 Lutetium suitability *

SARCOMA

- 61640 Staging
- 61646 Suspected residual or recurrent

SQUAMOUS CELL CARCINOMA

- 61610 Unknown primary (involves cervical nodes)

**Indicates new code.*
